*Names of children are placed up on the walls to display artwork

*Attendance board with children's pictures and names is placed on the door/attendance sheets are hung on a clipboard near the door

*Job chart is placed on the right side of the deck door. This is not introduced until separation period is over (about second week of school).

*cThis classroom is set up for four and five year old children.

*Another way to set up this room is to place the meeting area vertically, and place the two small tables next to eachother in the center of the classroom.

*When thinking of how to set up the classroom, I consider ways in which can be independent.
